

# Masterclass "Virtual Power Teams"

## Deliver Projects Quicker, Reduce Costs and Develop Your Organisation for the Future!

### Peter Ivanov- Virtual Power Teams

Wednesday, September 11, 2019

Thursday, September 12, 2019

Do You have remote workers?

Is Your Team distributed in several locations?

Do you want to learn how to handle remote team?

Then this Masterclass "Virtual Power Teams" is for You!

Become a Certified "Virtual Power Teams" Master so you can effectively lead, coach and support your Team and Organisation and deliver outstanding results!

In our always connected, digitally enabled and fast changing world of globalised business, many successful Managers, Entrepreneurs, Team Leaders and Project Managers lead projects and teams that are spread across different locations. The possibilities for physical in-person meetings or face-to-face conversations across these teams is often challenged by budget, logistics or time constraints yet greater agility and more fluid execution is required to succeed. Often when a Project team is physically dispersed, they suffer communication delays and sometimes complete failure for a wide range of reasons. International investments are put at risk due to intercultural issues or simply because the team members feel isolated and demotivated.

In this engaging and experiential masterclass, you will hear about several case studies illustrating the Virtual Power Teams method that will empower you and your teams to overcome these challenges, reduce these risks and help you gain a unique insight on how to deliver projects quicker, reduce costs and develop your virtual teams for your success!

The Open Masterclass "Virtual Power Teams" is a 2-day program which supports Senior, Middle and Project Managers to unlock the full potential of their virtual teams. It is also intended for HR Managers, Coaches and Consultants willing to extend their skill set towards leading virtual, remote and distributed teams.

The program is based on the Award-winning system "Virtual Power Teams" developed by [Peter Ivanov](#) and is ideal Add on to existing Agile and Scrum certifications and practices.

The Masterclass Insights Will Be illustrated with Real World Case Studies:

- **How to set the virtual team vision and goals** - Pragmatic insights proven in business, academia and NGO environments
- **How to leverage the unique strengths** and personality of each team member
- **How to establish structured communication** - Best practices catering for formal & informal, personal & professional aspects.
- **How to establish a team charter** - The "contract" between the team members for using and responding on the vital communication channels
- **How to inspire and maintain the Winning Spirit** across your distributed teams, and
- **How to establish the optimal Virtual Team Culture** for your projects!

Through various coaching exercises the participants **discover their strengths** and are led with **practical guidance** to set the vision and goals of their virtual team, establish communication structures and an optimal virtual culture – thus laying the **foundation for a successful Virtual Team**.

The program provides practical demonstration on how to enable and establish **effective virtual collaboration**.
